

Questions to ask:

1. What are the main challenges you face with the current feedback collection process?
2. Do you have an example of your current feedback forms (paper/digital) we can review?
3. What are your primary goals for this gamified tool like higher completion rate, better quality responses, or more engagement?
4. • How will you measure the success of this project (e.g., 80% completion rate, richer qualitative feedback, higher engagement)?
5. • Who are the main user groups filling out feedback like are they youths, adults, seniors, caregivers?
6. • Are there any demographic considerations (e.g., language preferences, digital literacy, age range)?
7. • How much time are participants usually willing to spend on feedback?
8. • What kind of questions are most important to ask in the feedback (e.g., satisfaction, learning outcomes, suggestions)?
9. • Do different events/programmes require different question sets, or should it be standardized?
10. • Are there any sensitive topics in feedback collection that we should handle carefully (e.g., health-related data)?
11. • What type of gamified experience do you envision such as quiz-style, storyline, spin-the-wheel, mini-game, etc.?
12. • Should the tool allow for rewards or incentives (e.g., badges, raffle entries, tokens)?
13. • Will this be integrated with any existing systems (e.g., SCS databases, email systems)?
14. • Will there be internet connectivity at all your events, or should the tool support offline mode?
15. • What kind of analytics do you want to track (e.g., completion rates, average time, common responses)?
16. • Should results be shown in real-time dashboards, or is a downloadable report sufficient?
17. • Do you already have any design preferences (look & feel, branding guidelines, colour schemes)?
18. • What is your timeline for a usable prototype?
19. • Are there any constraints (budget, tools, platforms) we should know about?
20. • How often would you like us to update you or get feedback during development?
